

## 3D PLASTIC POLYMER LENS VIEWPORTS

### DESCRIPTION:

To resist corrosion, these viewports are offered in zinc plated steel. The lenses can be removed in the field for cleaning, rather than purchasing and installing a new viewport. Extended lens design simplifies liquid viewing, especially on small sizes.

### FEATURES:

- Extended design simplifies liquid viewing, especially on small sizes.
- Straight protruding lens reduces distortion created by dome lenses.
- Removable lens allows for cleaning and servicing.
- Plated steel or brass bodies.
- Engineered polymer lens for long life.

### SPECIFICATIONS:

Body	Zinc Plated Steel
Window	Polysulfone
Max. Operating Temp.	325°F (162.7°C)
Max. Pressure	50 PSI (344 kpa)
Seal	Viton
