

CONTAMINATION CONTROL

Keeping lubricants clean and dry can greatly extend their useful life and maximize lubricating performance. Setting proper targets and limits will assist in defining how clean and how dry they should be to meet the equipment specific requirements. The challenge then becomes a matter of achieving these levels as cost effectively as possible. That is where Precise and Trico can help with their line of contamination control products and lubrication service.

PRODUCTS

- Drum Pump Filtration System
- High-Viscosity Filter Cart
- Low-Viscosity Filter Cart
- High-Viscosity Hand-Held
- Low-Viscosity Hand-Held
- Filter Media Elements
- Watchdog Desiccant Breathers
- Watchdog Extreme Humidity Breathers
- Watchdog Vapour Sentry
- Watchdog Oil Dryers
- Hydraulic Reservoir Breather Kits
- Expansion Chambers
