

LIQUID LEVEL GAUGES

DESCRIPTION:

Liquid level gauges provide easy viewing in many industrial applications. They are ideal for bearings, transformers, and many other non-pressure applications. Brass construction and glass tubes provide long life.

FEATURES:

- Guards are standard on all sights and may be rotated 360° for easy viewing.
- Glass tubes offer high temperature use to 250° F (121° C)
- Wide range of mounting styles to fit most applications.
- Vented design on all models.
- Optional top caps are available

SPECIFICATIONS:

Construction	Brass
Sight	Glass
Seals	Viton
Max. Operating Temp.	250°F (121°C)
